EDITORIAL

Dear Readers,
after decades of pioneering in durability, functionality, and design, our products are made to optimally adapt to the needs of their users.

Thought out down to the smallest detail, they fulfil the requirements for maximum concentration, maximum ergonomics and adaptability.

Made in Germany - On the Swabian Alb in Gruibingen, we produce in accordance with the highest quality standards, and mainly use regional raw materials.

Martin Moll

Martin Moll is responsible for the development and design of the moll products with passion and flair.

FROM THE SWABIAN ALB

INTO THE WORKROOMS OF THIS WORLD

OUR STANDARD

As much as the moll products differ from each other, they all have one thing in common – the requirement to set a new benchmark in at least one of the following categories: function, design, or quality.

This explains why the name moll – in over 50 countries today – symbolizes first-class, robust workmanship, German manufacturing, an unmistakable corporate culture, and a well managed company with a clear idea. All of this has been upheld for 95 years.

moll.
FOR GENERATIONS.

Driven by curiosity and ambition.

OUR PROMISE

LONGEVITY

Longevity is one of our most important corporate values. Our promise is to produce furniture for generations:

1. Our products grow with you. From schoolchildren to adults – our products adapt ergonomically to their users
2. Additions allow the furniture to be flexibly adapted to changing needs.
3. For us, sustainability is not limited to the use of regional materials, but also means ensuring a high quality of workmanship, so that our products can be passed down through generations.
4. The timeless design of our products also ensures that they will be used for a very long time.
5. Our product promise includes a 5-year quality and after-sale guarantee.

OUR PROMISE

QUALITY

Tested ergonomics, safety and quality

AGR

"Aktion Gesunder Rücken" tests products for their ergonomic properties.

www.blauer-engel.de/uz38

The Blue Angel

The Blue Angel guarantees that products are produced with low emissions and meet high standards in terms of environmental health & utility properties being fulfilled.

GS-Gütesiegel

GS seal of approval ensures that the product complies with the requirements of the Product Safety Act (ProdSG), inspected and tested by the TÜV-Rheinland:
www.certipedia.com

Patents

moll develops all fittings themselves. Many of these innovations are protected by industrial property rights.

Made in Germany

moll products are developed in Gruibingen (DE) and manufactured according to high quality and safety standards.

Certified sustainability

FSC and PEFC Certification

To ensure the preservation of forests, we obtain our wood from a certified supply chain. This guarantees an ecological and socially acceptable and sustainable forestry.

CARB II

moll wood-based materials are CARB II compliant with stricter limit values than E1 E05 according to the current test method. This is for purpose-bound use according to the current state of knowledge, these are harmless.

Desk surfaces

All decorative surfaces are tested for abrasion resistance, stain resistance, scratch resistance and impact stress in accordance with EN 14322.

Our responsibility

In our production, we use mainly environmentally friendly, recyclable and separable materials. In this way we keep the CO2 footprint of our products as small as possible.

OUR PROMISE

INNOVATION

Healthy learning and working. What does ergonomics actually mean? Ergonomics means taking as much of the strain as possible off the body and not forcing it to adopt forced postures. This is especially important during the development phase for children.

How does ergonomic furniture work?

Ergonomic furniture has a preventive effect and protects against postural damage. It is flexible, functional and variable in its adjustment options and offers sufficient freedom of movement. Ergonomic furniture thus promotes a natural and upright sitting position, supports the spine and protects against postural damage in the long term.

Our innovations are related to ergonomics, functionality and the optimization of the working and learning environment. We can ensure the long-lasting quality of our furniture through our patented functions. This means that our furniture is not only a long-term investment, but is also economically viable for our customers in the long-term.

PATENTED FUNCTIONS

INCLINE VARIANTS

Depending on the product, moll children's desks offer different levels of comfort regarding the inclination of the desk top. To ensure that nothing slips off the inclined desk top, all Winner and Champion versions

always come with a magnetic anti-slip device that can also be used as a ruler and magnifying glass. With the Joker, a simple anti-slip device is clamped to the edge of the table.

Joker tilting mechanism – latching position

The Joker table top can be easily tilted with the integrated spring support through 6 levels up to 16 degrees. At the same time, the latching prevents the plate from falling back unchecked.

Winner tilting mechanism – brake fitting

The table top can be continuously raised and lowered by up to 18 degrees to the desired angle using a lever under the table top. The adjustable fitting brake prevents the table top from falling back unbraked.

Champion – tilting mechanism with cable pull technology

The table top can be tilted gradually up to 20 degrees using a cable under the front edge of the table. The tilting mechanism with the patented safety clutch provides excellent pinch protection.

PATENTED FUNCTIONS

Classic

Classic is characterized by a manual hook fitting and the tables can be correctly adapted to the users and utility channels in just a few simple steps. Height information printed on the base helps with correct adjustment.

10-stage hook fitting

Adjustment range: 53 - 82 cm

Height: 1.20 - 1.90 m

Comfort

Comfort is characterized by an easy-to-use cable spool that allows the table height to be continuously adjusted. The rope spool can be attached to the table base and removed again for safety after setting it correctly. Height information printed on the base helps with correct adjustment.

Infinitely variable height adjustment via cable pull

Adjustment range: 53-82 cm

Height: 1.20-1.90 m

Express

Express has a large mechanical adjustment range. By pressing the control lever, the table can be adjusted faster than a person can get up - and all without electricity. The spring force of the table can be adjusted according to the table load, completely weight-neutral. The height adjustment can also be blocked.

Stepless quick height adjustment to sitting or standing height

Adjustment range: 69-114 cm, with height adapter: 79-124 cm

Height: 1.55-1.95m

FROM SMALL TO LARGE

FOR US

PRIME

PRIME is dedicated to homework.

Working from home is not only a socially relevant topic – it has been a core topic of our brand for years. With our products, we create the functional optimization of the requirements for concentrated learning and working at home.

Why?

Due to social and societal influences and changes such as people's decreasing attention span, poor posture over notebooks, the trend towards smaller living spaces, etc., the points of storage, ergonomics and the optimal use of the available space are becoming more important than ever.

If these points are taken into account in the study, children and adults can concentrate best. Therefore, the range of our product line PRIME, includes furniture for storage, with high adaptability and with the highest standards of ergonomics, in order to create an optimal workplace at home for children and adults.

The product line PRIME includes furniture for children and young people that leaves no wish unfulfilled in terms of quality, functionality, or durability.

The product line PRIME offers many options for individually configuring it upon purchase and also continuously adapting it to changing needs. When the table, chair and light are optimally tailored to the body, working method and space, the learning place becomes a favorite place - from the first class to graduation.

The product line PRIME includes three desk models: Joker, Winner and Champion as well as matching Additions and mobile pedestals and the two swivel chair models Maximo and Scooter. The rotating shelves Tower 56 and 64 create additional order and offer a lot of storage space next to the desk. The Mobilight and Flexlight workplace lights and a wide range of universal accessories round off the "PRIME" range.

CHAMPION

COMPACT

06 Champion Compact

Product features

The Champion Compact combines all the plus points of the Champion for the smallest of spaces. Thanks to its compact dimensions, it is the ideal solution for small children's rooms. But the "little one" can also be different: With two side tops or a flex deck, it grows in height and width. This makes the Champion Compact a highly flexible alternative.

MATERIALS, COLORS AND PATTERNS TABLES & ADDITIONS

1 Melamine coated wood-based panel:
moll furniture is made of wood-based panels in accordance with EN 312 and EN 14322. The Formaldehyde class CARB II is complied with, which is based on more stringent limit values than the E1 test method according to EN 120. As per the current state of knowledge, no damage to health or adverse effects will occur.

2 Painted MDF wood-based panels:
Sides consist of MDF wood-based panels. with primer foil: surface varnished with UV-curing Acrylic lacquer system. This was produced on a water-base and is therefore particularly environmentally friendly.

3 Solid oak or Walnut oiled:
Solid wood as a natural raw material from sustainable forestry (FSC certified). Tested according to EN 13353 and EN 13 017-2.

Blue Angel
The Blue Angel guarantees that products are produced with low emissions and meet high environmental, health & usage properties are met: [www. blauer-engel.de/uz38](http://www.blauer-engel.de/uz38)

Made in Germany
moll products are developed in Germany and manufactured according to high quality and safety standards.

FSC and PEFC certification
Confirms and certifies the responsible handling of the raw material wood. To ensure the preservation of our forests, we source our wood from a certified supply chain. This guarantees ecological and socially acceptable, and sustainable forestry.

CARB II
moll wood-based materials are CARB II compliant with more stringent limits than E1 E05 according to the current test method. This is not harmful to the health when used, according to current knowledge.

Desk surfaces
All decorative surfaces are tested for abrasion resistance to stains, scratching and impact stress in accordance with EN 14322.

Our responsibility
In our moll production we use primarily environmentally friendly materials. On the one hand, we want to keep the CO2 footprint of our products as small as possible. On the other hand, we wish to use materials that can be recycled and/or reused.

STORAGE FURNITURE

PRO

14 Pro

Product features

- The top of the three self-closing drawers is ideal for writing/art supplies. It's lockable and has a hidden secret compartment!
- The bottom two drawers in DIN format A3 offer generous storage space.
- All corners are rounded and therefore reduce the risk of injury.

- Three colors available to match the Joker and for all Winner variants (white, maple white, oak).
- Four smooth-running double castors (two lockable) make the container mobile.

CUBIC

15 Cubic

Product features

- The Cubic has three self-closing drawers.
- The top drawer is lockable and has a removable secret compartment.
- The lower two drawers in DIN A3 format offer generous storage space.
- The mobile container with its white decor is identical in design to the Champion.
- Four smooth-running double castors (two lockable) make the container mobile.

CUBICMAX

16 Cubicmax

Product features

- The Cubicmax offers even more storage space thanks to an additional drawer and a shelf attachment with two shelves variable in height and depth.
- The two shelves can be used either as one large shelf or as two smaller ones. This creates three divided compartments in the rear part of the shelf, with more height available in the front area, for folders, for example.
- Four smooth-running double castors (two lockable) make the container mobile.

TOWER 56

12 Tower 56 (square shaped revolving shelf)

Product features

The basic structure of the Tower 56 consists of base 1 and 2. Further additions, such as the Tower 56 Add-on and Shelf-set or the Baskets SQ 70 and 130 complete the Tower.

- The basic structure of the Tower 56 consists of bases 1 and 2. Further additions, such as the structure and the shelf set or the baskets SQ 70/130, complete the tower.

- With its low-noise pivot bearing, the Tower 56 can be rotated around its own axis and enables convenient access to every shelf on the tower.
- Integrated handle bars made of aluminum make turning easier, they also secure the contents of the shelf and are an elegant design feature.
- The Tower 56 has a soft anti-trap protection on the rotating floor.
- Adjustable feet allow the rotating shelf to stand securely, even on uneven floors.

TOWER 64

13 Tower 64 (circular shaped revolving shelf)

Product features

The basic structure of Tower 64 consists of Base 1 and Base 2. Further additions, such as the Tower 64 Add-on and Shelf-set or the Baskets RD 70 and 130 complete the Tower.

- The Tower 64 rotates on its own axis with its low-noise swivel bearing and allow convenient access to any shelf in the tower.

- The shelves can be mounted at any height.
- The Tower 64 can be expanded in height thanks to its practical modular design – basic shelf and add-on shelves.
- The Tower 64 has an ABS profile for a secure clamping protection on the rotating shelf.
- Adjustable feet allow the rotating shelf to stand securely, even on uneven floors.

ACCESSORIES

ACCESSORIES

- 34 Winner (Split) color set Trend
- 35 Winner Compact color set Trend
- 46 Champion color set Trend
- 67 Pro/Cubic/Cubicmax color set Trend

MATERIALS, COLORS & PATTERNS ACCESSORIES & ADDITIONS

For the individual design of the moll products we offer a variety of options. For the tables and roll containers, there are two color sets for the color caps and color stripes of the tables. We distinguish between the COLOR SET CLASSIC (blue, green, orange, pink, red, black), which is included with all Prime tables. With the Champion, the colors white & silver are also available.

The COLOR SET TREND (Nightshade, Lime, Khaki, Teal, Magnolia and Anthracite) can be purchased additionally to customize the desks and the roll-containers. There is a special feature: if you buy a Champion with the side panels in Lime, Anthracite or Teal, you get the TREND color set directly with it! Our storage products Baskets and Bottom Silo allow tidiness in the workplace, while the desk

pads inspire and at the same time protect the table tops. We offer the products in lively colors and motifs.

MOBILIGHT

100 Mobilight

Product features

- The plain white Mobilight made of aluminum with grey plastic applications has a rotatable lamp head with an integrated reflector.
- The swiveling light arm allows for right-handed and left-handed users.
- Energy-saving LED lamps with nominal rated power consumption 6 W; color temperature 3000K (warm white).
- Nominal service life 30,000 h bulbs.
- The patented 15.5 cm wide clamp base is suitable for a table top thickness of 13 to 40 mm and is clamped to the desk top. Holds even when the desk top is at an angle. Bright luminous flux 690 lumens.
- The illuminant is replaceable.

FLEXLIGHT

101 Flexlight

Product features

- The Flexlight has two moveable goosenecks and a ball joint on the clamp base, which allow maximum flexibility when adjusting the desk lamp.
- It also holds when the tabletop is tilted. The clamping foot is designed for a panel thickness of 13 to 25 mm.
- Luminaire head with 40 LEDs of energy efficiency class: G; 85% energy saving compared

to a 90W incandescent bulb; nominal luminous flux 690 lumens; rated power consumption 10 W; color temperature 3500 K; Rated life 25,000 hours. "On" button with additional night light function that can change color with one touch. If required, this function can also be switched off. The lighting is flicker-free via a sensor button and continuously dimmable from 100% to 5%.

“What the world of tomorrow will look like depends to a great extent on the imagination of those who are learning to read right now.”

Astrid Lindgren
